RESETTING A TRIGGER	5
NOTICE TO CUSTOMER / USER	6

OVERVIEW

The Infinity Lockdown trigger points are supplied in two styles: White for triggering Lockdown and Yellow for Call For Assistance.

Both styles of trigger points operate in exactly the same way and any functional descriptions described in this document are interchangeable between the two styles.

TRIGGERING A LOCKDOWN OR CALL FOR ASSISTANCE

Figure 1

The clear plastic face plate will snap back into the trigger and an indicator flag (indicating that the trigger has been activated) will drop down in the left-hand top corner (see figure 2).

The Lockdown or Call For Assistance sequence will have started.

Don't be alarmed if there is no immediate evidence that Lockdown has started. It can take up to 30 seconds for all the sounders to start.

Once the Trigger has been activated, it will send a signal to the System approximately every 60 seconds until it is re-set. Every time the System sees the trigger signal it will re-sound the sounders.

Figure 2

RESETTING A TRIGGER

When the trigger has been activated, it must be reset using the special reset key supplied.

Figure 3

Using the reset key supplied, fully insert the key in the hole on the underside of the trigger unit until the flag disappears (see figures 3 and 4)

Figure 4

Turn the key through about 90 degrees until the clear plastic face plate springs forward. Remove the key and close the anti-tamper cover.

The unit is now re-set and ready for use again.

NOTICE

NOTICE TO CUSTOMER / USER

Smar-Technology Ltd devices are intended only as an aid and support to your own existing policies practices and procedures.

Smar-Technology Ltd makes no representation as to the effectiveness or otherwise of your policies, practices and procedures.

It is the customer's/user's responsibility to ensure that the equipment is maintained in good working order and is operated in line with Smar-Technology's operating instructions.

Any misuse, fault or damage to any equipment or concerns about its functionality must be reported to Smar-Technology as soon as possible. The customer must not attempt to repair, replace or otherwise interfere with any equipment without the express written permission of Smar-Technology Ltd.

In the unlikely event of the System becoming damaged or in any way prevented from performing its intended function, it is strongly recommended that the customer's policies relating to the use of the equipment should include a fall-back procedure.

All equipment supplied is subject to our General Terms and Conditions of Sale, a copy of which is available on our product website www.infinity-lockdown.co.uk or on request from lockdown@smar-tech.co.uk

WEEE

In accordance with WEEE Directive (2012/19/EU) Smar-Technology Ltd aims to reduce the amount of waste electrical and electronic equipment.
